Description

Use these strips to run a common conductor through multiple terminals on any of the Temco T3 series controllers and I/O modules. This terminal strip speeds up wiring and improves the reliability of your terminations. Each of the pins on the strip screws into the terminal block. The outer bar is covered in high temperature ABS. They're available in 10 pin only version for now, you can cut them down for shorter runs or gang them up for longer runs.

Specifications

Specs	10 pin shorting strip
Spacing	3.1mm
Material	Galvanized steel, 0.8mm
Insulation	UL listed ABS
Maximum Current	10 amps
Maximum Voltage	110VAC
